                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             Sequence 30, Application US/10173461
Publication No. US20030138795A1
GENERAL INFORMATION:
APPLICANT: Bristol-Myers Squibb Company
TITLE OF INVENTION: POLYNUCLEOTIDE ENCODING A NOVEL HUMAN GROWTH FACTOR WITH HOMOLOGY
TITLE OF INVENTION: BPIDERMAL GROWTH FACTOR, BGS-8, EXPRESSED HIGHLY IN IMMUNE TISST
FILE REFERENCE: D0166 NP
CURRENT APPLICATION NUMBER: US/10/173,461
CURRENT FILING DATE: 2002-06-14
RICH REPROPERTION NUMBER: US 60/298,340
PRIOR FILING DATE: 2001-06-14
NUMBER OF SEQ ID NOS: 69
SOFTWARE: PatentIn version 3.0

Sequence 6.9, Application US/10615659

Publication No. US20040157234A1

GENERAL INFORMATION:

APPLICANT: Bristol-Myers Squibb Company

TITLE OF INVENTION: POLYNUCLECTIDES ENCODING A NOVEL TESTIS-SPECIFIC TUBULIN

TITLE OF INVENTION: TYROSINE-LIGASE-LIKE PROTEIN, BGS42

TITLE OF INVENTION: UNBER: US/10/615,659

CURRENT APPLICATION NUMBER: US/10/615,659

CURRENT FILING DATE: 2003-07-09

NUMBER OF SEQ ID NOS: 102

SGFWARE: Patentin version 3.2

LENGTH: 23

APPLICANT: Beigelman, Leonid
TITLE OF INVENTION: RNA Interference Mediated Inhibition of Vascular Endothelial
TITLE OF INVENTION: Growth Factor and Vascular Endothelial Growth Factor Receptor
TITLE OF INVENTION: Gene Expression Using Short Interfering Nucleic Acid (siNA)
FILE REFERENCE: 400/131 (MBHB02-742-F)
CURRENT APPLICATION NUMBER: US/10/665,951
CURRENT PILING DATE: 2003-09-18
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Remaining Prior Application data removed - See File Wrapper or PALM.
